

Omar and the Distant Stars

English Mood Academy

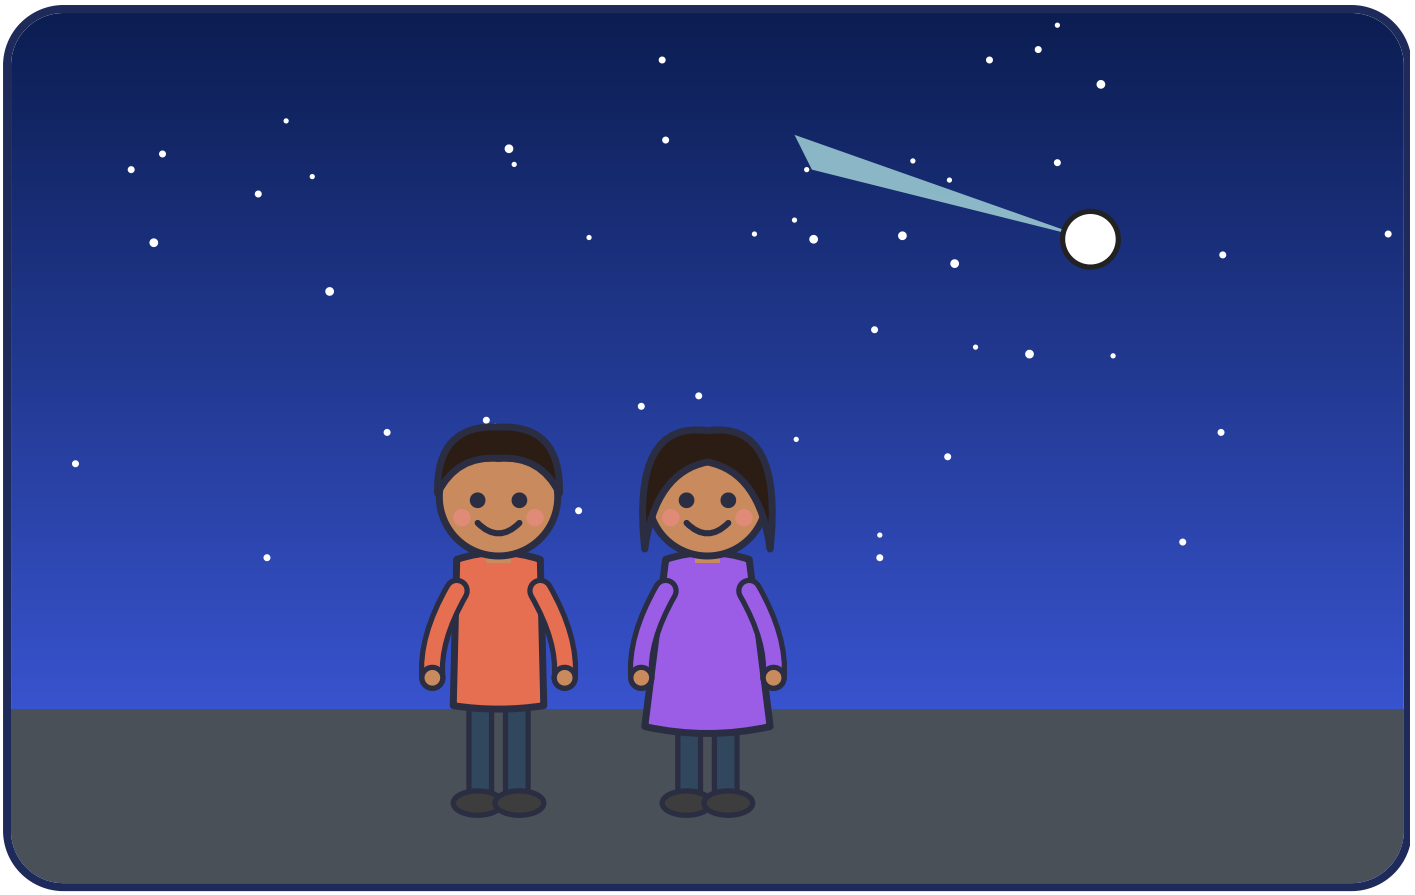

yellow = new words red = first conditional verbs

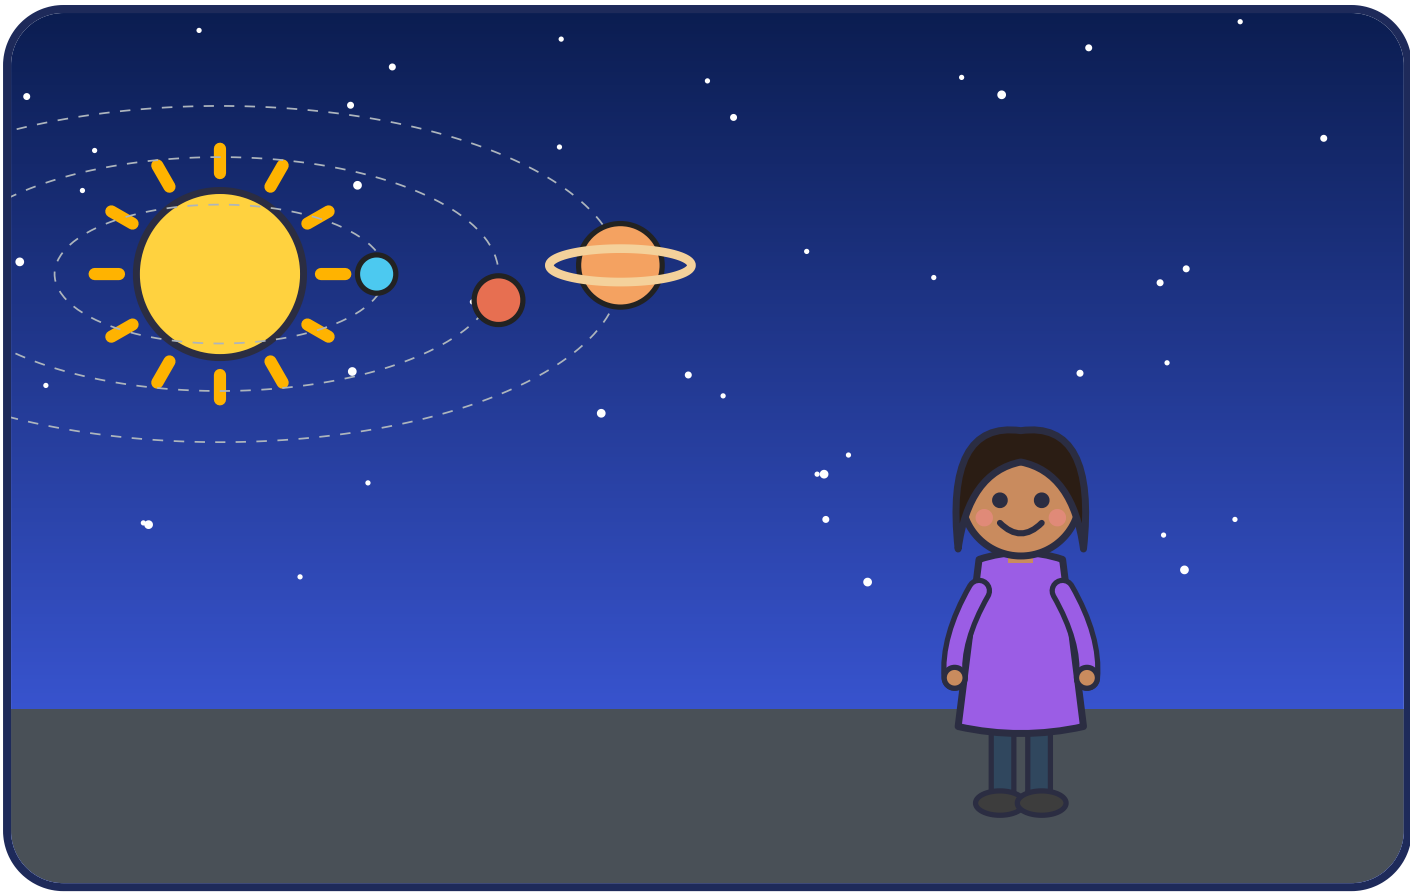

Omar dreams about space. Tonight he visits a big **observatory** with his sister Farida. "If the sky **stays** clear, we **will see** many **stars**," she says.

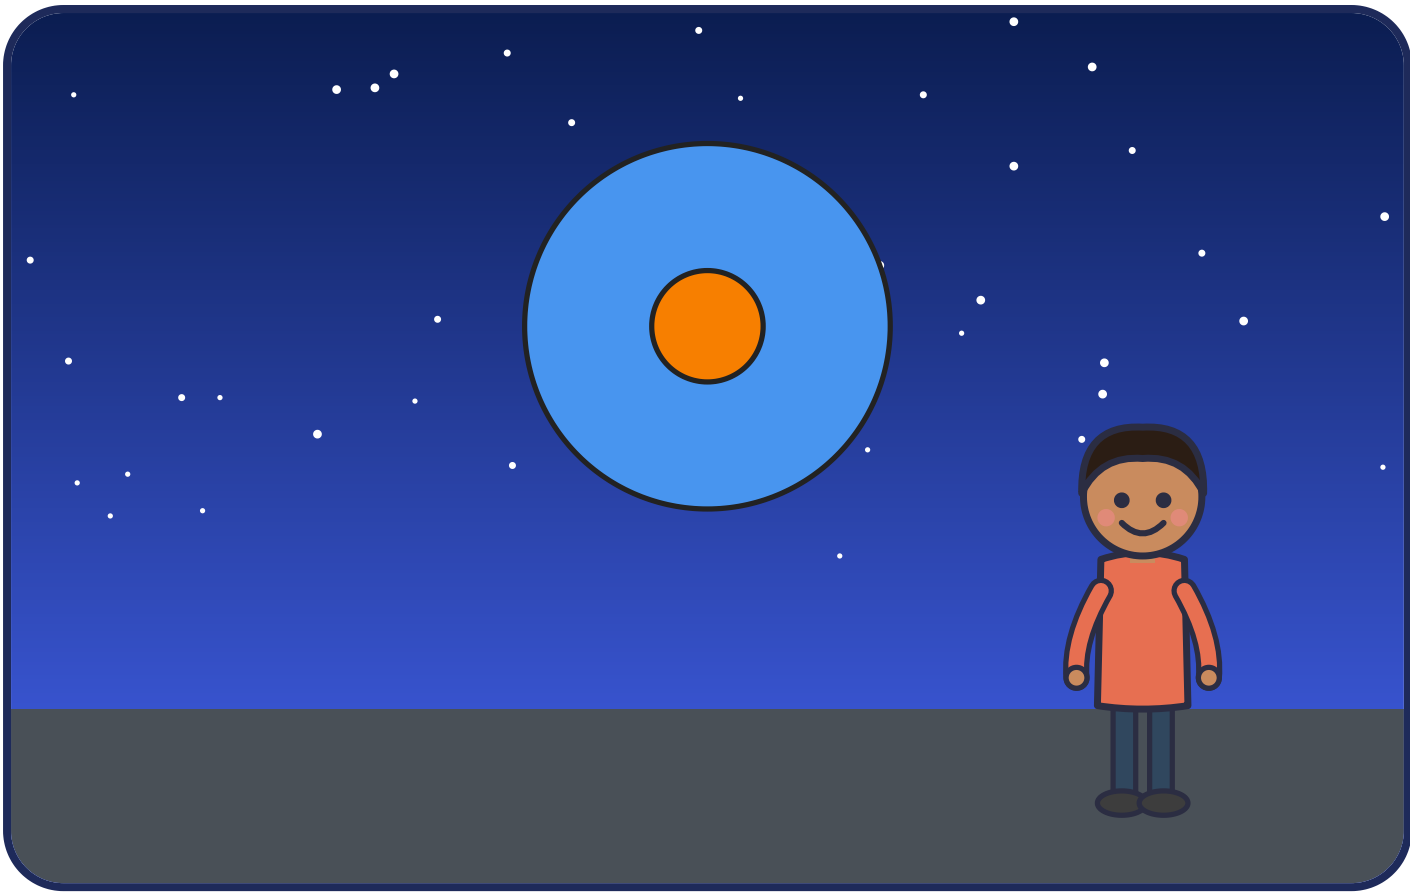

Farida points to a giant **telescope**. "If you **look** through it, a **distant** **galaxy** looks closer." Omar looks. "Wow! I can see the **moon**'s **surface**!"

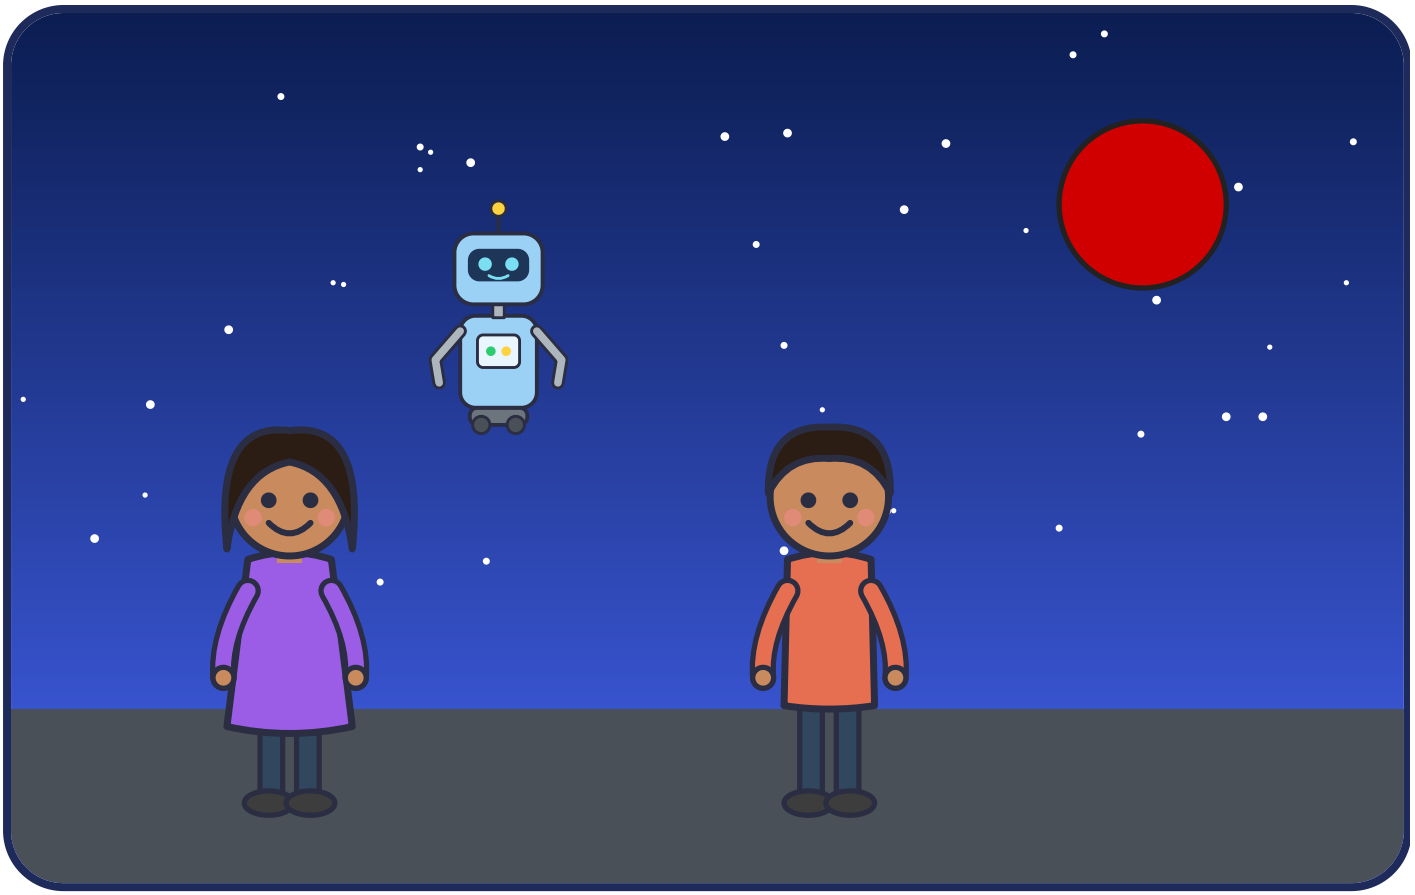

"Big rocks made those **craters**," Farida says. "If a **meteorite** **hits** the Earth, it **will make** a big hole. Small **asteroids** move around the sun too."

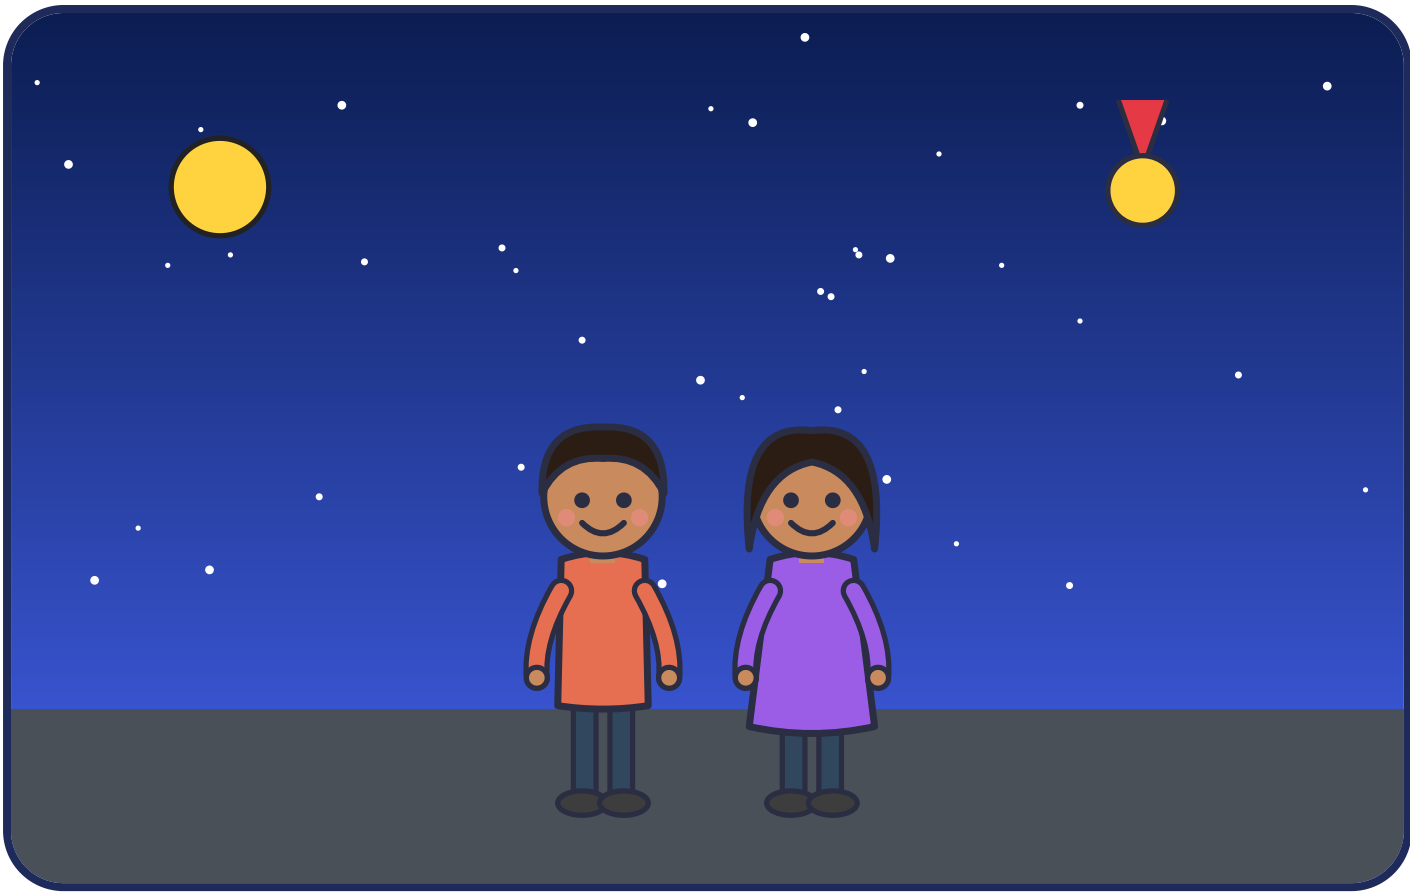

Suddenly they see a bright light with a long tail. "Is it a star?" "No! It's a **comet**! If we **are** careful with the camera, we **will take** a great photo."

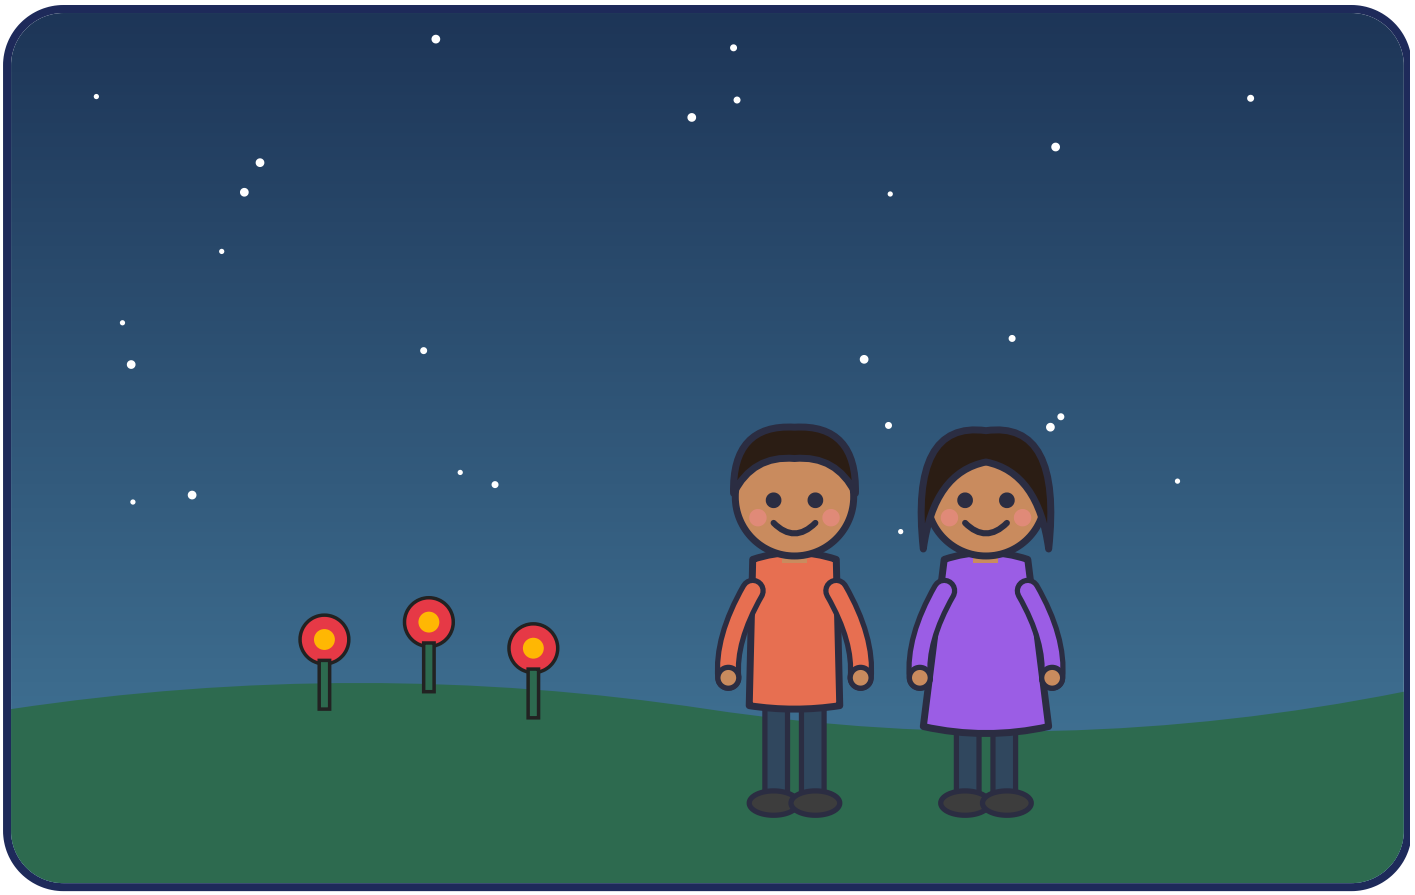

"Our sun and its planets are the **solar system**," Farida explains. "Each planet moves in an **orbit**. **Gravity** keeps it there. If the sun **pulls** the planets, they **will not fly** away."

"Earth is **unique**. Its **core** is hot, and its **diameter** is about 12,700 kilometres. Everything on it is made of **matter**. The **distance** to the moon is far, but not as far as a distant galaxy!"

"Can people go to Mars?" asks Omar. "Not yet. But we send a **space probe**. If it **finds** water, it **will send** the news back to Earth in a **spacecraft** signal."

Farida smiles. "An **astronomer** studies the sky every day. If you **study** hard, you **will become** one too. Hard work has great **importance**!"

Omar sniffs the night air near the garden. "The roses are **fragrant**! What a lovely **fragrance**!" Farida laughs. "If you **keep** learning, space **will stay** **important** in your life — not **arrogance**!"

At home Omar writes: "If I **read** about space every day, I **will know** the universe. If I **work** hard and stay kind, not **arrogant**, my dream **will come** true!"

The End 🌟

If you study hard and stay kind, your dreams will come true.

لو ذاكرت كويس وفضلت طيب، أحلامك هتتحقق.

Words from the story

observatory	مرصد	unique	فريد / مميز
stars	النجوم	core	لُبّ / مركز
telescope	تلسكوب	diameter	قُطر
distant	بعيد	matter	مادة
galaxy	مجرة	distance	مسافة
moon	القمر	space probe	مسبار فضائي
surface	سطح	spacecraft	مركبة فضائية
craters	فوهات / حُفر كبيرة	astronomer	عالم فلك
meteorite	نيزك	importance	أهمية
asteroid	كويكب	fragrant	عطر / له رائحة طيبة
comet	مُذنَّب	fragrance	عطر / رائحة طيبة
solar system	المجموعة الشمسية	important	مهم
orbit	مدار	arrogance	غرور / تكبر
gravity	الجاذبية	arrogant	متكبّر / مغرور

If + present · will + verb

stay → **stays** * · will see * · look (I / we / they) · hit → **hits** * · will make *

be → **are (we)** · will take * · pull → **pulls** * · will not fly * · find → **finds** *

will send * | study (I / we / they) | will become * | keep (I / we / they) | will stay * | read (I / we / they) | will know * | work (I / we / they) | will come *
