

Nour's Night at the Observatory

English Mood Academy

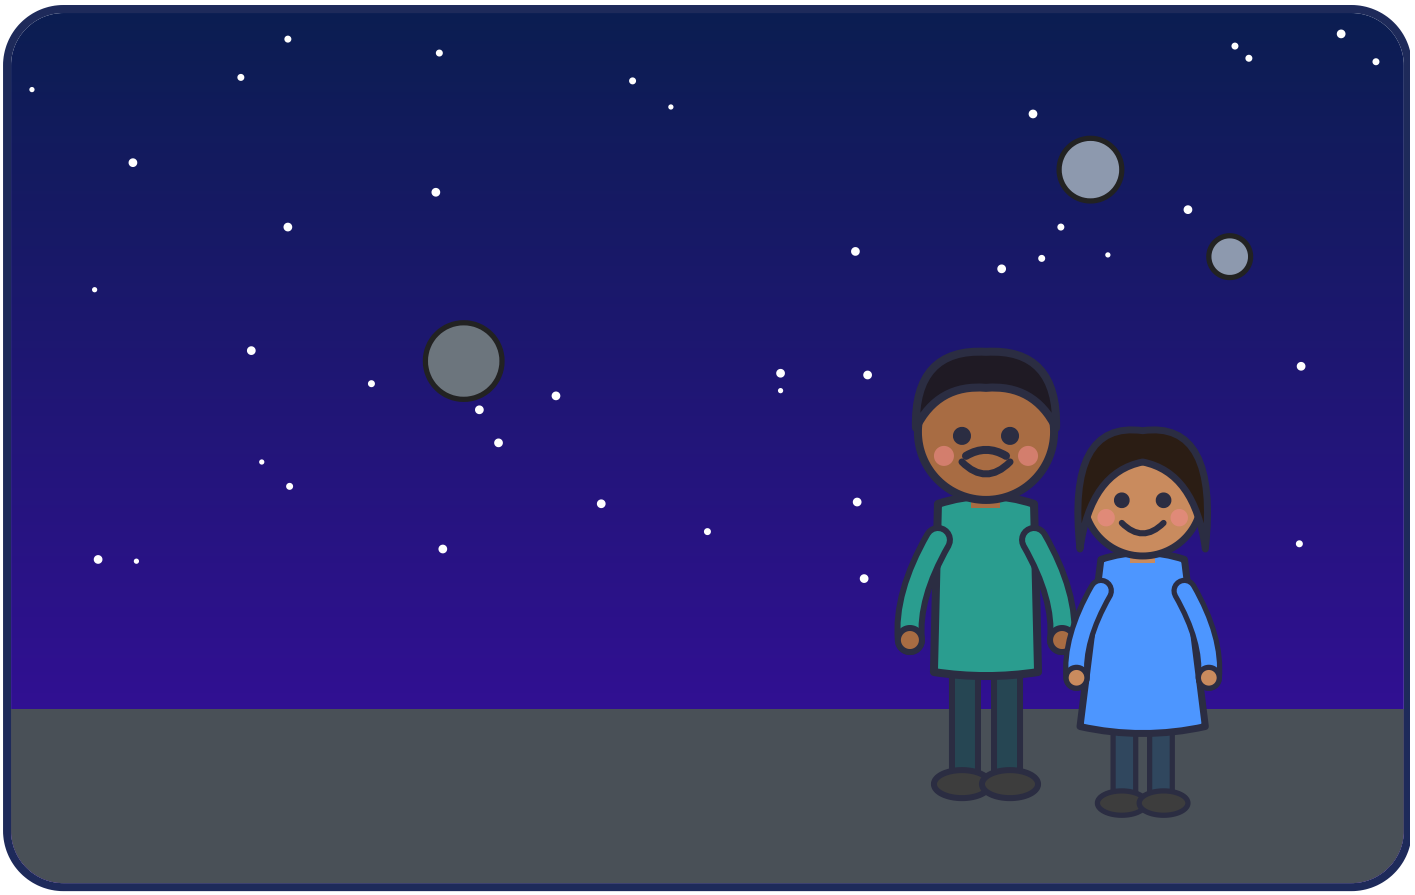

yellow = new words red = first conditional verbs

Nour loves space. Tonight she is at the **observatory** with her uncle Karim. He is an **astronomer**. "If the sky **stays** clear, we **will see** many **stars**," he says.

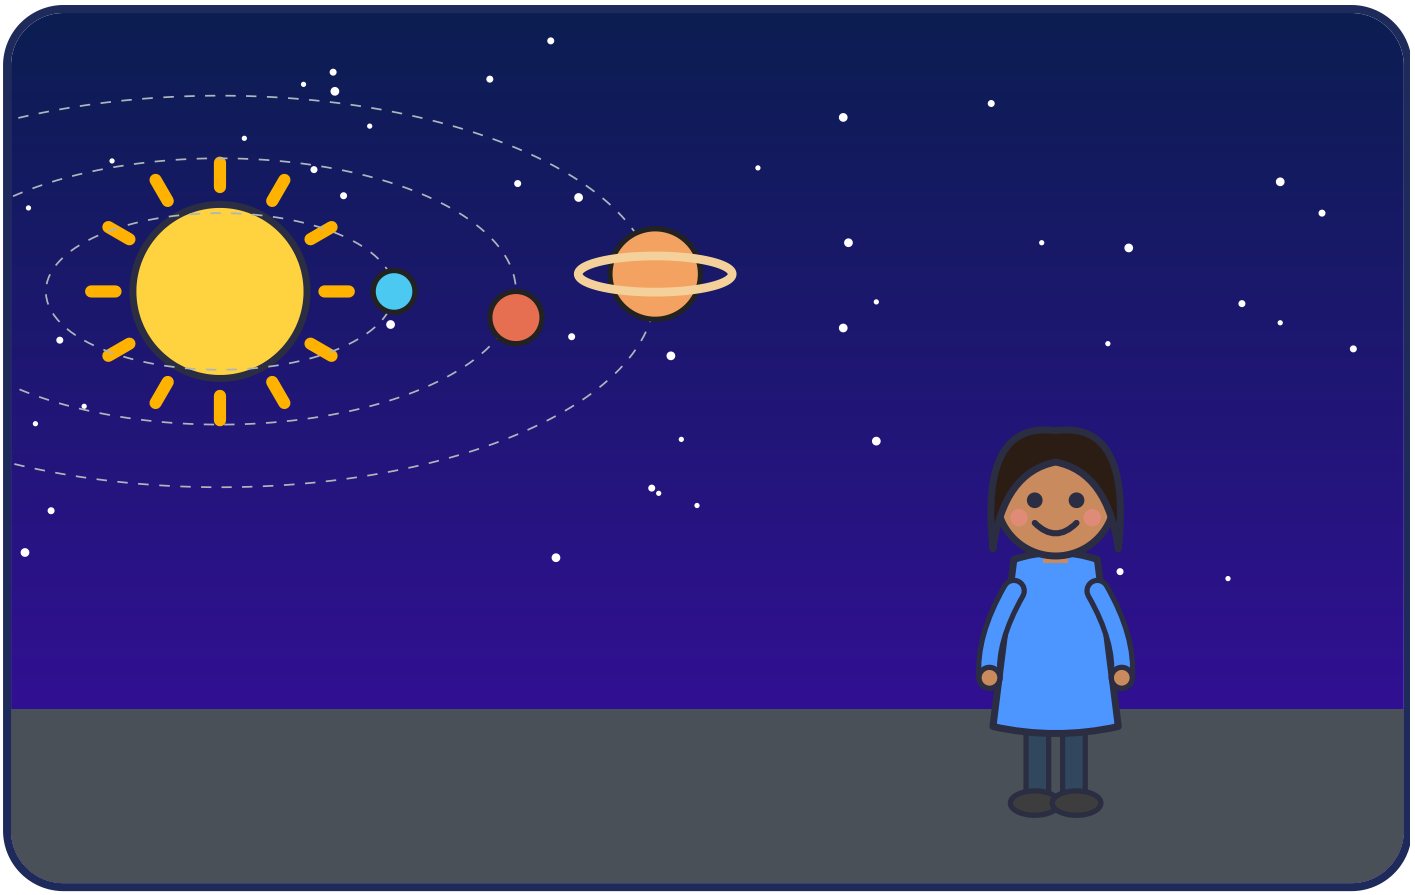

Uncle Karim points to a big **telescope**. "If you look through it, the **moon** looks very big." Nour looks. "Wow! I can see the **surface** and the **craters**!"

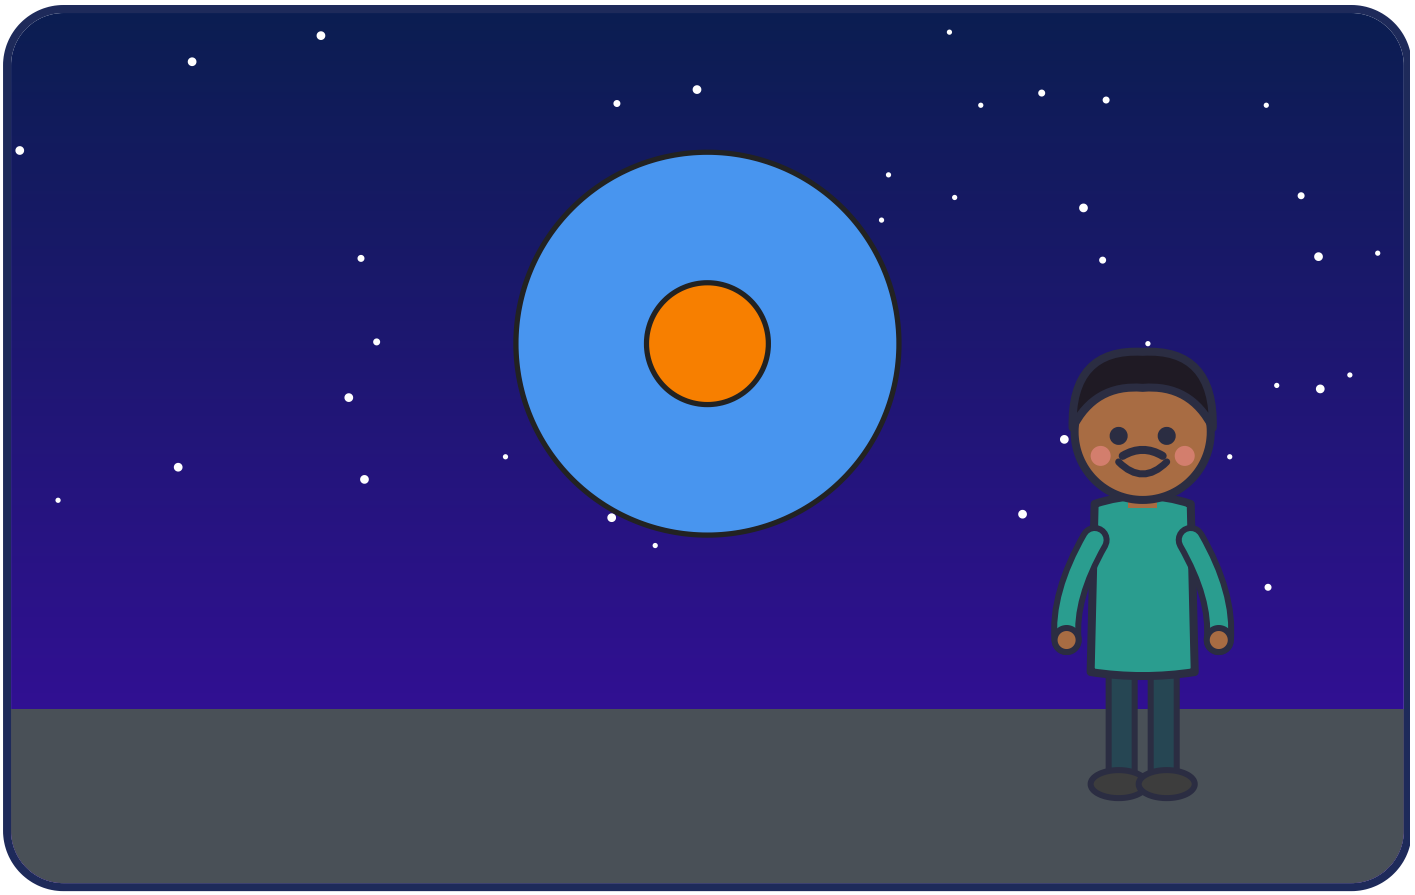

"Big rocks made those craters," says Uncle Karim. "If a rock from space **hits** the Earth, we call it a **meteorite**. Small rocky **asteroids** move around the sun too."

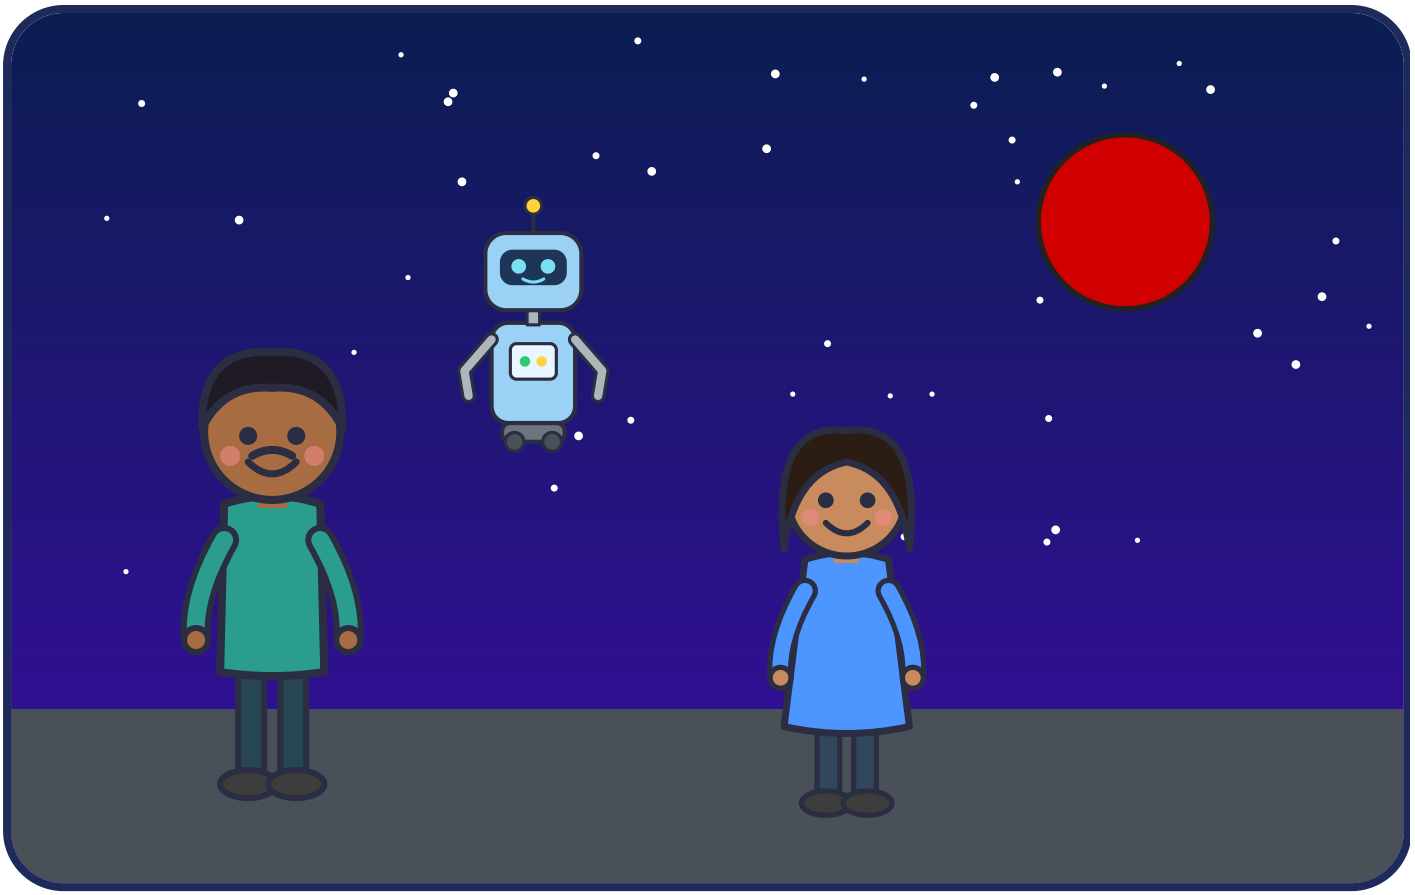

Suddenly, Nour sees a bright light with a long tail. "Is it a star?" "No, it's a **comet**! If we **are** lucky, we **will take** a photo of it."

"Our sun and its planets are the **solar system**," says Uncle Karim. "Each planet moves in an **orbit**. **Gravity** keeps it there. If the sun **pulls** the planets, they **will not fly** away."

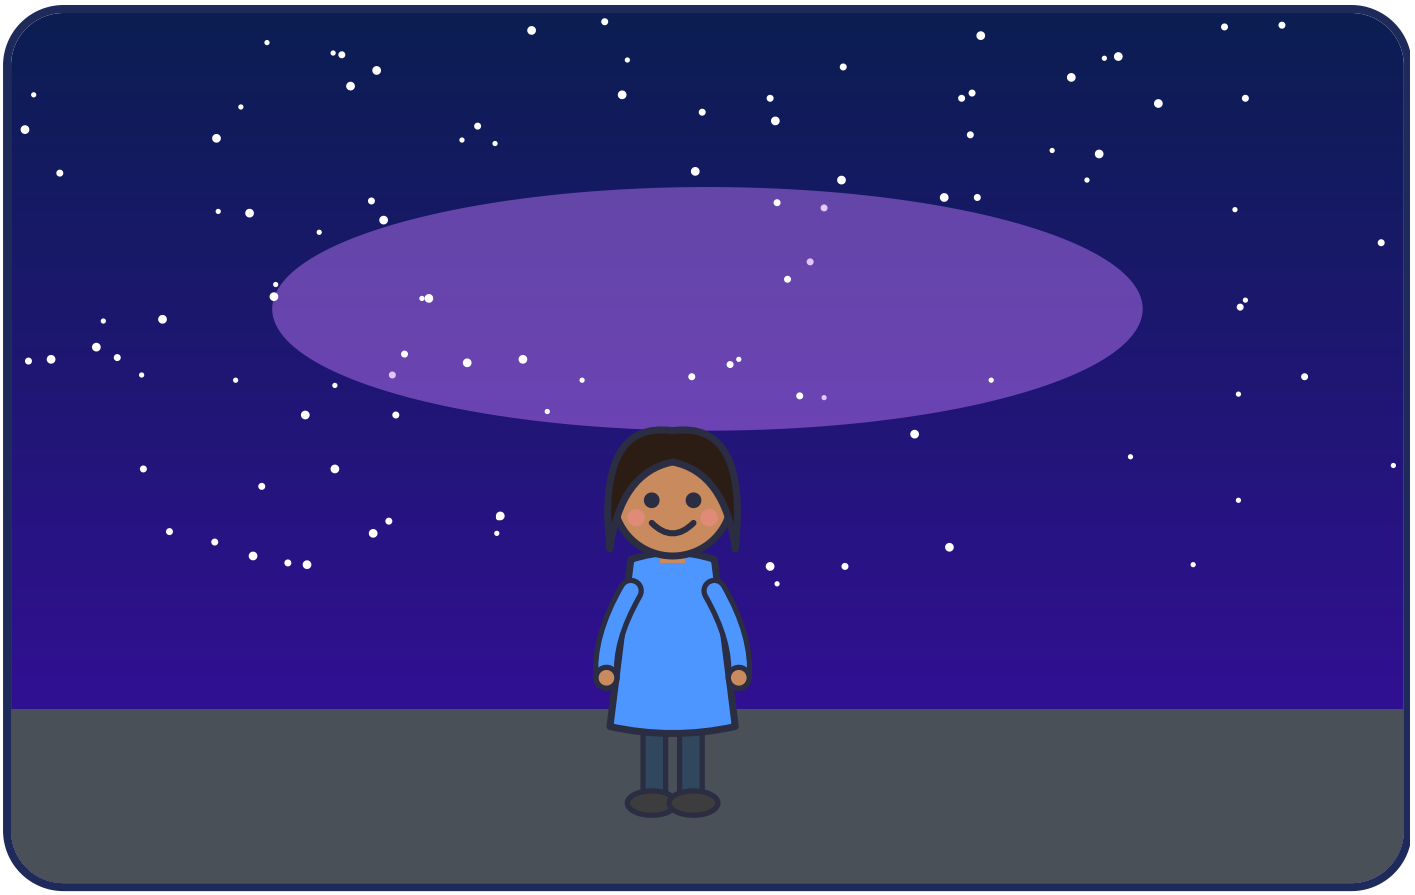

"The Earth is **unique**. It has water and life. Its **core** is very hot, and its **diameter** is about 12,700 kilometres. Everything on it is made of **matter**."

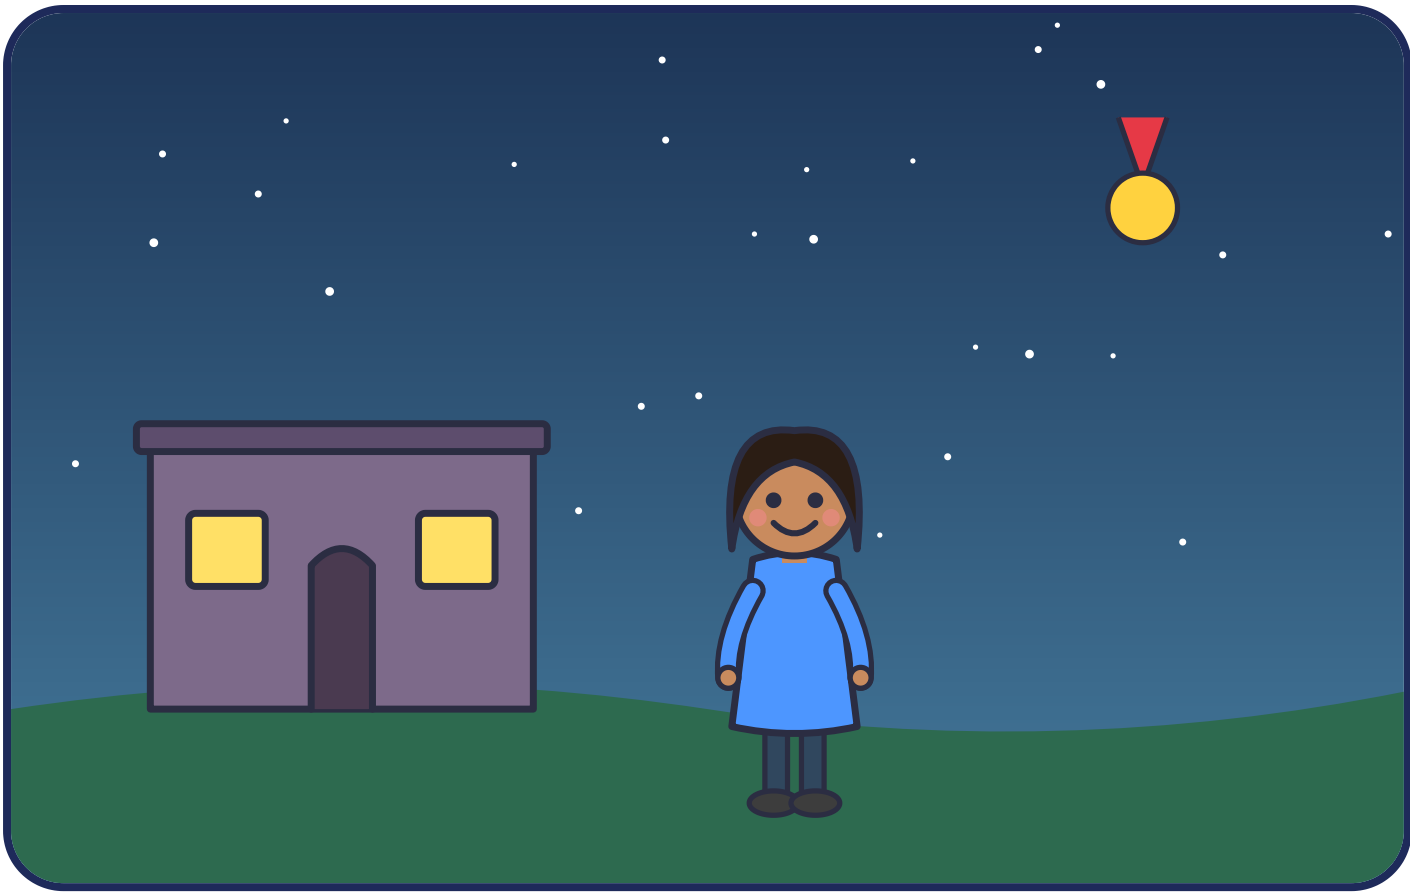

"Can people go to Mars?" asks Nour. "Not yet. The **distance** is too far. But we send a **space probe**. If it **finds** water, it **will send** the news back to Earth."

"One day, I want to fly in a **spacecraft**," says Nour. "If you **study** hard, you **will become** an astronomer too," smiles Uncle Karim.

Nour looks up again. "Our sun is only one star in a **galaxy**. And there are millions of galaxies in the **universe**!" "That's right," says Uncle Karim.

At home, Nour writes in her notebook: "If I **read** about space every day, I **will know** all the planets. If I **work** hard, my dream **will come** true!"

The End 🔭

If you work hard and keep learning, your dreams will come true.

لو اجتهدت وفضلت تتعلم، أحلامك هتتحقق.

Words from the story

observatory	مرصد	orbit	مدار
astronomer	عالم فلك	gravity	الجاذبية
stars	النجوم	unique	فريد / مميز
telescope	تلسكوب	core	لُبّ / مركز
moon	القمر	diameter	قُطر
surface	سطح	matter	مادة
craters	فوهات / حُفر كبيرة	distance	مسافة
meteorite	نيزك	space probe	مسبار فضائي
asteroid	كويكب	spacecraft	مركبة فضائية
comet	مُذنَّب	galaxy	مجرة
solar system	المجموعة الشمسية	universe	الكون

If + present · will + verb

stay → **stays** * · will see * · look (I / we / they) · hit → **hits** * · be → **are (we)**

will take * · pull → **pulls** * · will not fly * · find → **finds** * · will send *

study (I / we / they) · will become * · read (I / we / they) · will know *

work (I / we / they) · will come *
